A legacy for the future.

## Air Traffic Management innovation

State-of-the-art CNS solutions of the latest generation, together with weather systems and advanced airport air side solutions are today available within SELEX Sistemi Integrati to provide gate-to-gate operations wherever innovative approaches to air operations are required, in any part of the world.

Our systems solutions are at all times flexible, expandable, scalable and cost effective. Our offer is complemented by ATC training facilities and In Service System Support. Innovation is of paramount importance for SELEX Sistemi Integrati, based in Italy, UK, USA and Germany, be it for land, sea or air operations.
